

Dear Parents of _____
First name Last Name

Our school has purchased a subscription with a number of seats to the Rocket Math Online Game. Your child has been assigned one seat. The Online Game should be played at home as well as at school. Your child can login through any device that uses a browser such as a laptop, tablet or phone. Earphones are important so your child can hear corrections as well as sound effects and congratulations.

The Rocket Math Online Game keeps track of your child's progress wherever he or she works, whether at home or at school. **A practice session will only last from five to ten minutes** and then a "battery recharge" of 30 minutes will be given. Your child won't have to practice for too long at a time. We recommend a practice session or two each evening.

Here's the URL for where to play: <https://play.rocketmath.com>

We recommend bookmarking that site for future use.

Your child's login information is as follows:

Username _____

Passcode _____

Account number¹ _____

Practice in the Learning Track assigned to your child (such as addition, subtraction, multiplication, or division) proceeds through 26 levels (A to Z) with 3 parts in each level: Take-Off, Orbit, and Universe. Your child will be recognized by the game for progress and they can share their progress with you. Here's to enjoying a fun way to develop fluency with math facts, making math easier and more successful.

¹ Early adopting schools may be using a School Name instead of an Account number. It will work.
